## Why Detoxify?

### What are "toxins" and why should I detoxify?

A toxin is any compound that has a harmful effect upon your body. You are exposed to toxins daily from the foods you eat, the water you drink, and the air you breathe. These toxins are the pesticides and herbicides used to grow your food, the large amounts of hazardous wastes in your soils, the air pollutants you breathe constantly, most cleaning materials you use, alcohol, drug, and cigarette use, bacterial infections, and viruses. It is critical for you to remove all toxic material from your body. If toxins accumulate in your body they will cause significant disruption of your overall health.

### Some signs you have toxic material in your body...

- ◆ More than 20 pounds overweight
- ◆ Poor coordination
- ◆ Intestinal complaints
- ◆ Low energy
- ◆ Deficient immune function
- ◆ Fatigue
- ◆ Constipation
- ◆ Trouble sleeping
- ◆ Indigestion
- ◆ Inability to concentrate
